

Testing Procedure

- 1 Verify that the green button is emitting a steady light - this indicates the system is operating correctly.
- 2 Press and hold the green test button.
 - If the green light turns off, it means none of the red buttons are pressed.
 - If the green light blinks, it means one or more red buttons are pressed.
- 3 While continuing to hold the green test button, press the red button for 30 to 33 seconds. This will send a test alarm to all recipients configured to receive test alarms.
- 4 After this time period, first press the red button again (to release it), then release the green button.
- 5 Successful test completion should be confirmed by one of the recipients of the test alarm message.

Note: Message delivery may take up to 30 minutes to reach all recipients.

Important Notes

- Always ensure the system is in normal operating mode before testing
- Inform relevant personnel before conducting tests
- Document all test results for compliance purposes
- **Message delivery may take up to 30 minutes** - please be patient when waiting for confirmation
